To whom it may concern,

My name is Nathanael Kenzler, and I am a first-generation college student pursuing a Master of Science in Marketing after completing my undergraduate degree in Business Administration at the University of Arizona. I am writing to share insight into who I am as a professional: how I work, how I learn, and the direction I am building toward. I am drawn to roles where I can contribute within a high-performing communications or marketing team while expanding my skills in ways that make the work around me more effective.

I approach every role with the same mindset, focused on learning often and thoroughly, thinking critically, and raising the standard of the work around me. My experience across marketing support, client-facing projects, and team coordination has given me a practical understanding of how businesses function. Whether supporting team projects under pressure, coordinating with stakeholders, or contributing to brand and go-to-market efforts, I have consistently taken on responsibility and sought challenges rather than avoiding them.

One of my core strengths is critical thinking and using it to break down complex ideas into clear narratives. I am comfortable learning technical concepts and organizing them to create alignment across audiences. This has helped me build trust with colleagues and clients, support stronger decisions, and contribute in environments where clarity drives outcomes. It is a huge part of what draws me to communications and marketing, where strategy, communication, and execution intersect. This is where my adaptability and work ethic allow me to thrive in fast-paced settings.

Outside formal roles, I am actively and deliberately building skills. I am using this academic year as a development period while gaining exposure to AI tools and automation, exploring their application to communications, marketing, and business challenges. Alongside my graduate studies, I have begun certifications in Tableau and SQL, focusing on a foundation in data and analytics before expanding into programming such as Python or C++.

I am motivated by high standards, continuous improvement, and contributing value beyond any single role. I aim to make a meaningful impact through outcomes, on teams, and on the people those efforts ultimately support. Thank you for your time and consideration. I look forward to discussing how my mindset and skills could support your team.

Until Then,

Nathanael Kenzler

WORK EXPERIENCE

SIGNIFYMD | DIGITAL MARKETING CONSULTANT — **TUCSON, AZ** — **JULY 2026 - PRESENT**

- Benchmarked 230+ Oncology Brothers posts by tumor type and format for sponsor pitches, now building an AI-automated dashboard to replace manual re-pulls
- Evaluated 18 analytics platforms to deliver a self-serve LinkedIn and X segmentation tool non-technical KOLs run
- Leading new initiative to investigate digital-operations + AI-adoption gaps and propose solutions for the team

MARKETING & DIGITAL COMMUNICATIONS INTERN — **TUCSON, AZ** — **MARCH 2026 - JULY 2026**

- Ran ASCO 2026 demand gen, converting 600+ AI-sourced leads to 280+ registrations
- Recapped competitor social-media activity from ASCO 2026 for executives, with recommendations for future events
- Translated executive vision into engineering scope across the OncUpdates.com v2 relaunch, audit to launch

VASA FITNESS | PERSONAL TRAINER & MEMBER EXPERIENCE SPECIALIST — **TUCSON, AZ** — **2023 - 2025**

- Managed 27 concurrent client accounts at peak, self-directing all communications, materials, and progress reporting to hold client churn under ~15% per any given 6 months
- Translated complex client performance data into clear, accessible guidance non-expert audiences could act on
- Proposed a digital client-documentation system that leadership approved and rolled out to all trainers

BAY AREA K9 ASSOCIATION | RESIDENT HANDLER AND OPERATIONS ASSISTANT — **SANTA CLARA, CA** — **2021 - 2023**

- Represented the brand at industry expos and produced the original photography and marketing assets behind public-facing campaigns

PROJECTS

SIGNIFYMD - ONCBROTHERS CAMPAIGN

Supported SignifyMD's KOL clients, the OncBrothers, through the relaunch of the company's physician-education platform, OncUpdates.com. Work spanned ASCO 2026 lead research, competitor analysis, an executive recap, content production, and much more.

PHARMACOVIGILANCE INTELLIGENCE SYSTEM

Architected a 4-strategy multi-agent RAG system (LangChain, ChromaDB, OpenAI, Gradio) for FDA adverse-event detection, replacing manual review with guardrailed retrieval. Since then I have translated these findings into my personal open source/weight AI OS.

See the portfolio link above for more projects and case studies
